

A LEGACY FOR THE FUTURE

Old-world trades and craftspeople creating our future legacy

For intricate jobs and specialist, rare trade skills, you will be delighted with the service and talent offered at GN Olsson Mastercraftsmen, with its years of experience and tenacity for correct research and authentic methods and materials.

GN Olsson Mastercraftsmen is a nationally accredited and renowned antique and heritage conservation, restoration and reproduction specialist in any era or style. Since 1983, this group of talented, old-school, professional trades and craftspeople have been helping clients achieve their heart's desires.

No job is too big or too small. You may want a library of distinction — perhaps feature floor inlays, ornate handrails and wall panelling throughout — or antique doors, windows and fanlights adjusted to fit your

classic new building.

Or maybe you have a smaller task such as a long-case clock to conserve, a Louis XVI inlaid parlour suite to sympathetically restore or a 19th-century English four-poster bed to convert to king size.

Smaller still, you may have lovely old door furniture you'd like restored, fitted and keyed to work again or need a French mantel clock serviced. This company can even design and craft custom bookbinding to create your family history heirloom — a legacy for future generations.

Discover more about the company's intricate joinery and heritage architectural features, fine and antique furniture, clocks, books, homewares and collectables.

Access this qualified team from old-world trades and crafts — including joinery, cabinetry, furniture and chair making,

traditional upholstery, and specialty glazing (bevels, stained glass and leadlights). Also, there are metal finishers, gilders and French polishers who can even colour match in modern and old finishes. In metal, the blacksmith, micro-engineer, locksmith, gilders, gold and silversmiths will take on any challenge. You'll be impressed with the leather-embossing and gilding service for desktops and upholstery.

Pride of workmanship and sourcing of authentic, premium materials ensure quality work and preservation of our heritage. APS
